GOAL Longterm collaboration
Friendly environment

EDUCATION **STŘEDNÍ ŠKOLA INFORMATIKY A ŘEMESEL ROŽNOV POD RADHOŠTĚM**

Field: Information processing
2014 - 2017

**VSB – TECHNICAL UNIVERSITY OF OSTRAVA – FACULTY OF ELECTRICAL
ENGINEERING AND COMPUTER SCIENCE**

Field: IT
Bachelor's degree
2017 - 2021

**PRACOVNÍ
ZKUŠENOSTI**

BONU.SK – Frontend developer

May 2024 – now

Bonu.sk is a web platform that serves as an aggregator for various discount offers and benefits for users.

As a frontend developer on the project, I focused on creating responsive, user-friendly interfaces.

The use of Nuxt 3's server-side rendering capabilities helped improve SEO and initial page load times, while TypeScript provided static type checking to minimize errors and improve code quality throughout the development process.

YD IT LABS – FULLSTACK DEVELOPER

May 2021 – now

Development of an internal tool for document management and electronic signing. I worked on backend in Node.js (TypeScript) and later in Kotlin language with framework Micronaut. On frontend side I worked especially with Vue.js + TypeScript and with Backend I communicated via REST api. I used MySQL databases. For version control we used Git (Bitbucket).

We tried to follow agile principles and used tools from atlassian stack (JIRA, Confluence) that helped us for planning and documenting our tasks.

I got in touch with Docker and AWS.

LINUXBOX – JAVASCRIPT DEVELOPER

Jun 2020 – Apr 2021

Programming of internal and external applications in Javascript. Development of modules for CRM system. I implemented real-time support webchat, that was part of my bachelor thesis. I used technology WebRTC and WebSockets for this. LinuxBox is focused heavily on database layer, so I was working enough time with Postgres database. On

backend I used Node.js and on client side Vue.js with Backend I communicated via REST api. I was also writing small automation scripts in Bash or Python.

MORAVIO – CODER

Červen 2019 – Leden 2020

coding web sites (HTML, CSS, SCSS, WORDPRESS)

MARKETYNG.CZ – CODER

Září 2018 – Leden 2019

Creating and coding web sites in WordPress

SCHOPNOSTI A DOVEDNOSTI

I like to explore new things and technologies, that are for me not only something I study or something I do just for job, but it's also hobby.

I like to work in team, but also alone.

Driver license

Languages: Czech, Slovak, English

TECHNICKÉ DOVEDNOSTI

Languages

- Javascript / Typescript
- Kotlin

Frontend

- HTML, CSS/SCSS
- Tailwind
- Bootstrap
- Vue.js (Nuxt, Quasar, Vuetify)
- GraphQL
- Socket.io

Backend

- Node.js – express, koa, fastify
- Micronaut
- Unit testing – JUnit, Mockk
- Rest API
- HTTP
- Postgres
- MySQL

Devops

- Docker
- Git
- AWS

- Bash
-
